TanStack Query

ACHIEVEMENTS

Mobile App Development at Ideon Information Technologies

Developed and launched mobile applications using React Native, Expo, and AI integration. These applications improved client engagement and enhanced user experiences by introducing real-time data processing through sockets.

Web Development at Ideon Information Technologies

Contributed to the successful development of web applications using Next.js, TanStack Query, and Tailwind. These projects led to a significant improvement in website performance and scalability for clients.

Admin Panel Development at Mebant Isolation and Band

Co-developed an admin panel that streamlined business processes and improved usability for internal teams.

Data Normalization at Eskisehir Industrial Zone Directorate

Played a key role in improving database performance by optimizing data normalization processes.

Academic Achievement

Awarded a 75% scholarship for a Bachelor's Degree in Software Engineering, with courses taught entirely in English. Also graduated second place in high school with a focus on Mathematics and Science.
